12. Statements can be grouped together using braces ‘{’ and ‘}’. A group of statements is sometimes called a **block**. Single statements are evaluated when a new line is typed at the end of the syntactically complete statement. Blocks are not evaluated until a new line is entered after the closing brace.

Enter this statement:

```
{ x <- 0+ x + 5 + }
```

Describe the output.

Error: unexpected '}' in " { x <- 0+ x + 5 + }"

The closing brace ")" is error with the given statement

13. *Set up a vector named score, consisting of 72, 86, 92, 63, 88, 89, 91, 92, 75, 75 and 77. To access individual elements of an atomic vector, one generally uses the x[i] construction.

Find x[2] and x[3]. Write the R code and its output.

```
score <- c(72, 86, 92, 63, 88, 89, 91, 92, 75, 75, 77)
```

```
score[2]
```

```
score[3]
```

```
#OUTPUT : x[2]=86, x[3]= 92
```

14. *Create a vector a = c(1,2,NA,4,NA,6,7).

a. Change the NA to 999 using the codes print(a,na.print="-999").

```
a = c(1,2,NA,4,NA,6,7)
```

```
print(a,na.print="-999")
```

```
OUTPUT
```

```
[1] 1 2 -999 4 -999 6 7
```

b. Write the R code and its output. Describe the output.

```
a <- c(1,2,NA,4,NA,6,7)
```

```
print(a,na.print="-999")
```

```
OUTPUT
```

```
[1] 1 2 -999 4 -999 6 7
```

Describe the output: When comparing the first and second statements, "-999" was substituted for "NA."

15. A special type of function calls can appear on the left hand side of the assignment operator as in > class(x) <- "foo".

Follow the codes below:

```
name = readline(prompt="Input your name: ")
```

```
age = readline(prompt="Input your age: ")
print(paste("My name is",name, "and I am",age ,"years old.))
print(R.version.string)
What is the output of the above code?
name = readline(prompt="Input your name: ")
Input your name: Dazzele Mae S Frias
age = readline(prompt="Input your age: ")
Input your age: 19
print(paste("My name is",name, "and I am",age ,"years old.))
[1] "My name is Dazzele Mae S Frias and I am 19 years old."
print(R.version.string)
[1] "R version 4.2.1 (2022-06-23 ucrt)"
```
